DETAILED ACTION

1. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group **Art Unit 2643**.
2. This communication is responsive to the applicant's preliminary amendment filed on 05/03/2000.

Specification

3. The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(1). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

Claim Objections

4. Claims 4, 6 and 7 are objected to because of the following informalities:
... analog input (I₁, I₂) ... , and please see figure 3.
Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

5. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 2, it recites the limitation "the potential " in line 4. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Killion et al. (US-6,075,869) in view of Brennan et al. (US-6,236,731).

Regarding claims 1-2, Killion et al. disclose a hearing aid comprising: a microphone system (140) encapsulated in a shielding case (Fig. 9) as claimed. But Killion et al. do not clearly teach an ADC mounted on the shielding case as claimed. Brennan et al. disclose a hearing aid comprising two microphones and two ADC for obtaining acoustic signals for digital signal processing. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to be motivated to provide ADC for Killion's hearing aid as an alternate choice, in order to provide a capability of digital signal processing for the hearing aid. Furthermore, it would also have been obvious to one having ordinary skill in the art at the time the invention was made to be mount the ADC on the shielding case because the shielding case includes a plurality of connector for microphone system output to ADC.

Art Unit: 2643

Regarding claims 4 and 6-7, Killion et al. further disclose the hearing aid, wherein the microphone system (140) is a directional microphone system including a first microphone and a second microphone (Fig. 9) for receiving and processing directional acoustic signals.

Regarding claims 3 and 5, Killion et al. further disclose the hearing aid, wherein the microphone system (140) is a detachable module (Fig. 9).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
